

## Career Services Assignment Week 2 – GitHub Profile Setup

**Instructions:** Follow the steps below to set up your GitHub account profile. After watching the video, *Source Control with Git Overview*, you should have already set up a GitHub account for this program. If you have not setup your GitHub account, review the above video in Week 1's curriculum and set your account up before proceeding with this assignment.

1. GitHub should not be thought of as a resume or networking tool as much as it should be a place to showcase your work and code. To that end, having a GitHub profile that is personalized shows potential employers or clients that you care about your work.
2. Now that you are set up with GitHub, let's get your profile page ready to go!
3. First, upload a high-quality headshot to your profile page.
4. Next, update your profile to discuss what you do and what you are learning. You must think about this one, because GitHub doesn't give you too many characters to accomplish this task.
5. Follow at least three (3) of your classmates, teachers, or any repository of interest to you.
6. Go to one of your repositories and update the **About** section to discuss what the purpose of the assignment is and tag the languages used like below:

7. Finally, add a link to your GitHub profile on your LinkedIn page.

**NOTE:** If you are choosing not to update a LinkedIn page because of your specific employment situation, that is acceptable. If this is the case, please put a note below the **Attach Screenshots of Your Finished LinkedIn Profile here** section below.

## Career Services Assignment Week 2 – GitHub Profile Setup

Attach a Screenshot of Your updated GitHub Account here

The screenshot shows a GitHub profile for user 'eyu-ars'. The profile includes a circular profile picture of a man with glasses, a bio stating 'Oracle certified associate. Self Motivated. Keep Learning. Java | SQL | MySQL | Spring | Spring Boot | HTML', and a button to 'Edit profile'. It also shows '0 followers · 4 following' and a LinkedIn link. The 'Popular repositories' section lists 'week-1 assignment' and 'week-2' (working with java loops, Boolean operations and conditional statements. @java). The '13 contributions in the last year' section shows a calendar grid with green squares indicating contributions. The 'Contribution activity' section shows 'Created 10 commits in 2 repositories' for March 2023.

The screenshot shows a GitHub repository page for 'eyu-ars/week-2'. The repository is public and contains a single commit by 'eyu-ars' with the message 'week02 lab is committed'. The commit details show the file 'Week02BooleanConditionalsLoopsLa...' and the commit hash 'c827529'. The repository has 0 stars, 1 watching, and 0 forks. The right sidebar shows the repository description 'Working with java loops, Boolean operations and conditional statements. @java' and sections for 'Releases' (No releases published) and 'Packages' (No packages published).
